

HEMATOLOGY / ONCOLOGY / IMMUNOLOGY SECTIONS & CHEMOTHERAPY PREPARATION LABORATORY ("THE CENTER")

Spectrum of Diseases Treated: The Center encompasses modern equipment, innovative procedures, highly qualified manpower and ancillary services for Diagnosis, Prevention, Screening, Palliation, Supportive care and Treatment of Cancer, Leucemias, Lymphomas, Anemias, Leukopenias, Thrombocytopenias and other Blood Cell Diseases, Bleeding Disorders, Thomboembolic Complications, Management of Transplantations and Complications, Aplastic Anemias, Inborn Errors of Metabolism and Immunologic Disorders.

Facilities: The Medical Oncology/Hematology/Immunology Sections and the Chemotherapy Preparation Laboratory at the Hippocrateon Private Hospital, are fully equipped units constantly supported by a wide spectrum of medical, surgical subspecialties and ancillary services required for the safe and state of the art advanced and holistic treatments/procedures required for most efficacious management of oncological and blood diseases, collectively. The Hospital comprises advanced level laparoscopic, endoscopic and DaVinci robotic procedures. Multidisciplinary Special Clinics, like "Breast, Gastroenterology and Gynecology/Urology Clinics", offer a full-range of customized team approaches in management of common as well as complicated or controversial cases.

Services: The Center is ideal for individuals seeking most effective modern up-to-date diagnostic and therapeutic answers to difficult, complicated or otherwise catastrophic diseases like cancer, leukemias, lymphomas, myelomas, bleeding/thomboembolic disorders, anemias, myeloproliferative neoplasms, dysplastic syndromes, immunodeficiency states, cytopenias e.t.c. In addition, it offers specialized counseling and work-plans for early diagnosis/effective prevention/reliable prognostic estimation and rationalized prophylaxis against both acquired and genetic diseases like some cancers, leukemias, thrombotic and bleeding disorders, inborn errors of metabolism and immune disorders.

High Caliber Clinical and Academic Human Resources: Board certified attending physicians, specialized MD's, registered nurses and all other health professionals integral to efficient and specialized medical treatment, are available on the premises of the Center ready to satisfy the most

demanding patients, needing: Chemotherapy, Transfusions, Venesections, Immunotherapies, Palliation, Supportive Care, Recuperation from oncological surgery or Radiotherapy or Transplantation while stationed or visiting or working or vacationing in Cyprus.

Academic Affiliations: Hippocrateon (and the Center) has been proclaimed a University of Nicosia Medical School/Saint George's University of London Medical Program-affiliation and serves as surgery and internal medicine training Campus for medical students and its Director, Dr. George Marcoullis (see uploaded CV), is a Professor of Medicine at that School and Academic Lead for the Medical School's training program at the Hippocrateon Hospital.

Cooperation with Overseas World Renowned Medical Institutions: The Center is affiliated with other pertinent Institutions of Excellence in the USA, Great Britain, Russia, Israel, Greece, Germany, France and elsewhere, offering unique opportunities for most productive and effective collaborations with renowned specialized teams from all over the world. A relatively recent addition to the Center is its affiliation with the Russian “Lebedev Physical Institute Protnivo” for high accuracy and minimally radiotoxic proton therapies.

Medical Tourism: Cyprus is a unique attraction and tourist destination with picturesque landscapes, rich antiquities, more than 10.000 years of history and civilization dating back to stone ages. In addition, Cyprus is an EU and Eurozone member-state, which is characterized by its people's multilingual dexterity, cultural diversity and inviting hospitality, which coupled to its highly qualified and diversified scientific manpower and its people's high caliber-education-level, offers ideal attractions and perfect conditions for medical tourism.
